

# PROJECT: ATBI Aquatic Hemiptera

## Species Site Count for 2008

| Family                | Genus         | Epithet + Subspecies (Common Name) | Site Count |
|-----------------------|---------------|------------------------------------|------------|
| <b>Belostomatidae</b> |               |                                    |            |
|                       | Belostoma     | flumineum (Giant water bug)        | 1          |
|                       |               | testaceum (Giant water bug)        | 1          |
| <b>Corixidae</b>      |               |                                    |            |
|                       | Hesperocorixa | interrupta (Water boatmen)         | 1          |
|                       | Sigara        | virginiensis (Water boatmen)       | 1          |
|                       | Trichocorixa  | calva (Water boatman)              | 1          |
| <b>Gelastocoridae</b> |               |                                    |            |
|                       | Gelastocoris  | oculatus oculatus (Toad bug)       | 2          |
| <b>Gerridae</b>       |               |                                    |            |
|                       | Aquarius      | conformis (Water strider)          | 1          |
|                       |               | nebularis (Water strider)          | 1          |
|                       |               | remigis (Water strider)            | 17         |
|                       |               | species (Water strider)            | 2          |
|                       | Gerris        | buenoi (Water strider)             | 1          |
|                       |               | comatus (Water strider)            | 3          |
|                       |               | insperatus (Water strider)         | 1          |
|                       |               | species (Water strider)            | 1          |
|                       | Limnoporus    | canaliculatus (Water strider)      | 1          |
|                       | Metrobates    | hesperius (Water strider)          | 2          |
|                       | Rheumatobates | species (Water Strider)            | 2          |
|                       |               | trulliger (Water Strider)          | 1          |
|                       | Trepobates    | pictus (Water strider)             | 1          |
|                       |               | subnitidus (Water strider)         | 5          |
| <b>Hebridae</b>       |               |                                    |            |
|                       | Hebrus        | species (Velvet water bug)         | 2          |
| <b>Hydrometridae</b>  |               |                                    |            |

(Where "Species" appears, it means that this has not yet been identified.)

| Family              | Genus          | Epithet + Subspecies (Common Name)          | Site Count |
|---------------------|----------------|---|------------|
|                     | Hydrometra     |   |            |
|                     |                | australis (Water measurer)                  | 3          |
|                     |                | martini (Marsh treader)                     | 1          |
